

Pump controller for water technology

The system pump controller MAR / MAG / MAH:

can be easily monitored with various LTE gateways or routers. Gateway or router are installed in the control cabinet and ready for operation.

An operator app is also available

Ethernet-Mobil Gateway 145 Modbus

Technical data: Gateway - LTE operation

Application: MAG/MAR/MAH controller

Power supply: 12-24VDC

Connection: RS 485 + antenna SMA

SIM card: Data card (customer)

Order number: MAZ-TRB145-LTE-RS485

Ethernet-Mobil Gateway 140 LAN TCP/IP

Technical data: Gateway - LTE operation

Application: MAG/MAR/MAH controller

Power supply: 12-24VDC

Connection: LAN TCP/IP + antenna SMA

SIM card: Data card (customer)

Order number: MAZ-TRB140-LTE-Ethernet

Ethernet-Mobil Router 240 LTE / WLAN / LAN

Technical data: Router with SIM card or network

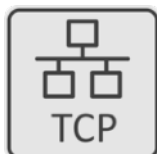

Application: MAG/MAR/MAH controller

Power supply: 12-24VDC

Connection: Ethernet / WLAN+antenna SMA

SIM card: data card or network

Order number: MAZ-TRUT240-Router

Application: monitoring of pressure stations, irrigation systems
